

Jodie A. Short

Jodie Short joined the Every Child Succeeds program at Cincinnati Children's Hospital Medical Center in 2002. Ms. Short has more than twelve years of experience in data collection and MIS systems for home visitation and prevention services. She has expertise in developing and implementation of design plans between program and state data collection systems, integrating program and evaluation objectives with data integrity and designing such systems to maximize usability and quality improvement. Ms. Short manages all aspects of the ECS home visitation program's MIS system (eECS) including development/design, testing, life cycle planning, training and user support. In addition, Ms. Short is a member of the Design Options for Maternal, Infant, and Early Childhood Home Visiting Evaluation (DOHVE) TA Team, providing evaluation technical assistance to grantees funded under the federal Maternal, Infant, and Early Childhood Home Visiting Program (MIECHV). Ms. Short has contributed to several publications and presentations in the health care and home visitation fields. Her primary areas of interest include user ownership of data systems, program collaboration and data driven decision making.

Ms. Short received her Bachelor of Science degree in Social and Behavioral Sciences from Indiana University. She is currently enrolled in the Master of Science degree program in Health Service Administration at Xavier University. Ms. Short received the 2008 YWCA Career Women of Achievement Rising Star award and the Award of Excellence from the CCHMC Research Foundation in 2007. She is a member of the Society for Clinical Data Management, American Evaluation Association and the American College of Healthcare Executives.
